

Task 7

Ramadan Kareem, hoping you are doing well.

In this task, we will learn how to pass a state into any component in our app using useContext hook.

Resources:

- [State management using useContext](#)
- [useContext Simple app](#)

Reading list (for knowledge):

- [How to use localStorage in JavaScript.](#)
- [Usecontext for user authentication.](#)

Task:

- Just research about `useReducer` & `useContext`.
- Take a look at `Markdown` language

Submission:

- After mastering them
- Send **Task-7 Done** to channel called Tasks in discord → Must be the same message don't edit it.

Deadline:

Sunday, March 23 at 11:59 pm.
